

北區活躍的火山活動及河流侵蝕塑造現時香港特有的地貌。北區的崇山峻嶺(紅花嶺、八仙嶺)及秀麗河溪(流水響、梧桐河)帶來豐富的天然綠地和醉人美景。綠化總綱圖的設計概念抽取當中的山丘和河溪元素，利用色彩鮮艷奪目的植物品種營造歡迎的感覺，襯托出種植主題。

Born of dramatic volcanic activity the tremendous landform of Hong Kong has been weathered by its rivers. Robin's Nest, Pak Sin Leng (Mountains) and Lau Shui Heung, Ng Tung River (Rivers) contribute enchanting scenery and fruitful greenery to North District. This has inspired the landscape design with its elements of "River" and "Mountain". This concept will be realised through the use of themed planting which is bright colourful and welcoming.

錦繡山河

*A Landscape Born of
River and Mountain*

可供選擇的主題樹木品種:
Potential Theme Tree Species

- 大花紫薇
Lagerstroemia speciosa
- 洋紫荊 *Bauhinia blakeana*
- 楝 *Melia azedarach*
- 黃花風鈴木
Tabebuia chrysantha
